How paid messages work:

https://secserv.me/?my_message_id#client_secret

secserv.me
server

Encrypted message content

secserv.me
**web
application**

X

server_secret

Server checks if user paid
for the message and
send server_secret only
in this case

server_secret + client_secret + password (optional) -> encryption key *

encryption key + encrypted message content -> message content **

Others who use this device won't see your activity, so you can browse more privately.
This won't change how data is collected by websites that you visit and the services that
they use, including Google. Downloads, bookmarks and reading list items will be saved
